# Capital Improvement Plan

## BACKGROUND

---

The Capital Improvement Plan (CIP) is a multi-year plan for capital expenditures to replace, maintain, and expand the city's infrastructure. The city uses the CIP to develop infrastructure and maintain the quality of life offered to residents and businesses.

The capital budget supports non-recurring expenditures, such as the construction of buildings, acquisition of property, repairs and improvements to roadways, building maintenance, and the efficient operation of the water, sewage, and storm water systems. Capital funding is limited to the cost of the project and may be expended over several fiscal years until the project is completed. Other costs associated with the capital budget include, but are not limited to the following:

- Architectural and engineering fees;
- Site development; and
- Major equipment.

The city uses a long-range planning process that results in a Five-Year CIP. This Five-Year CIP provides residents with an outline of how the city anticipates investing capital dollars for the next five years. Each capital project included in the CIP is either approved for funding in FY 2023, or included as a planned project in FY 2024 through FY 2027. The inclusion of a project beyond the current budget year does not guarantee it will be funded in the future. The needs of the city may shift and result in changes during the next annual budget cycle.

A project that is included in the city's capital budget is broadly defined as requiring the expenditure of public funds for the purchase, construction, enhancement, or replacement of physical infrastructure/assets and may take several years to complete. Whether a project is included in the CIP or in the city's operating budget is determined by its size and scope. Any project authorized in a department's operating budget must be completed or committed by a contractual obligation within the fiscal year in which the funds are appropriated.

To be included in the CIP, the project must cost \$75,000 or more. Furthermore, the project should enhance, increase the value of, or extend the life of the asset beyond the life of the debt instrument used to finance the improvement or grant program.

## GUIDING PRINCIPLES

---

Guiding principles are used to help shape the CIP. These principles include, but are not limited to the following:

- Develop a capital plan that includes projects that meet City Council priorities;
- Ensure the CIP will be the platform for development in neighborhoods and business communities; and
- Preserve and enhance the existing tax base.

The CIP decision-making process coincides with the budget development cycle. Departments submit projects for the upcoming five-year plan which are presented to city leadership via budget hearings and committee meetings for review and discussion. To guide the CIP decision-making process, projects are evaluated on the degree to which the following objectives are met:

- Adhere to legal or contractual obligation or federal or state mandate;

- Address health concerns, safety or emergency needs;
- Leverage outside funding through a match of federal, state, or private funding;
- Produce positive community impact through the formation of partnerships with residents and businesses to leverage public dollars, making Norfolk the community of choice for living, working, and leisure activities;
- Enjoy broad community support;
- Result in unacceptable outcomes if the project is deferred;
- Ensure existing infrastructure and/or equipment is maintained and replaced in a timely manner;
- Address flooding through meaningful projects;
- Make directed investments in neighborhoods;
- Redevelop the St. Paul's Area;
- Use dedicated revenue to fund projects; and
- Ensure consistency with plaNorfolk2030 comprehensive plan, NorfolkVision2100, and other City Council adopted plans.

## FUNDING CIP

---

A combination of funding sources are used to implement the CIP. Below are descriptions of funding sources used to support the CIP:

- **Reappropriation of Previous Authorization:** Funds provided for projects in prior years that are completed and have excess funds, or funds that are reappropriated because of a shift in city priorities.
- **Fund Balance:** Use of undesignated General Fund Balance. This is the accumulated total of all prior years' actual General Fund revenues in excess of expenditures that were not appropriated by City Council and have not been designated for other uses.
- **American Rescue Plan Act (ARPA):** Federal stimulus funds given to the city to speed up the recovery from the economic and health effects of the COVID-19 pandemic.
- **State and Local Fiscal Recovery Funds (SLFRF):** Funding provided by the Coronavirus State and Local Fiscal Recovery Funds (SLFRF), under ARPA, to support recovery from the COVID-19 pandemic.
- **Budget Savings:** Funds that were not expended over the course of the fiscal year.
- **Reversion Funds:** Funds that were originally appropriated to Norfolk Public Schools (NPS) but weren't expended during the fiscal year, and reappropriated by City Council for their use in the subsequent year.
- **Transfer from General Fund:** Cash contribution from the General Fund to the CIP.
- **NPS Reversion:** Cash contributions from Norfolk Public Schools (NPS).
- **Transfer from Public Amenities Fund:** Cash contributions from a special revenue fund, which collects one percent of the prepared food tax rate and one percent of the lodging tax rate to promote cultural and entertainment activity.
- **Other Cash Contribution:** Cash contributions from other sources to the CIP, such as grants, donations, other state or federal aid, or other reprogrammed funds.

- **Bonds (Debt):** The city's debt is defined by the sources of repayment: General Fund supported debt service and nongeneral fund supported debt service. General Fund supported debt is pledged to be repaid from tax revenue. Nongeneral fund debt is intended to be repaid from revenue derived from other revenue sources such as fees.

## **NONGENERAL FUND PROJECTS:**

Projects below are supported through nongeneral fund revenues, such as user fees, and are not paid from taxes:

- **Parking Facilities (PF):** Improve the city's parking infrastructure systems, including architectural design and construction of multi-level parking facilities, promote tourism, and retain and attract businesses.
- **Storm Water Utility (SW):** Improve the city's storm water infrastructure system, including drainage improvements, system repairs and rehabilitation, and system cleaning and drainage studies in neighborhoods citywide.
- **Towing and Recovery (TR):** Support the city's ability to keep abandoned vehicles off the public right-of-way and address code violations. There are no projects in this fund for the FY 2023 - FY 2027 CIP.
- **Wastewater Utility (SF):** Improve the city's wastewater infrastructure system including the operation and maintenance of collection sewers, pump stations, and sewer force mains.
- **Waste Management (WM):** Support the city's ability to comply with regulatory requirements related to its landfills. There are no projects in this fund for the FY 2023 - FY 2027 CIP.
- **Water Utility (WF):** Improve the city's water infrastructure system and perpetuate the city's economic vitality.

## **POLICY AREA DESCRIPTIONS**

---

The FY 2023 – FY 2027 CIP uses policy areas to categorize project funding. The policy areas used are described below.

### **Education:**

Projects in this category enhance the educational infrastructure of the city to improve instructional service delivery. They are most likely to be school related activities, but can be any educational capital-type project. This would include construction projects to improve, replace, and/or build new elementary, middle, and high school facilities. Related funds for acquisition of property and designs are also included.

### **Economic Development:**

Projects in this category improve the city's infrastructure systems and encourage the city's continued economic vitality. They may also provide funds for public infrastructure improvements designed to enhance and support private sector investments in a variety of neighborhoods and commercial areas of the city.

### **Environmental Sustainability:**

Projects in this category are intended to create a positive, regenerative effect on the environment, including opportunities to mitigate detrimental environmental impacts in the city. Projects in this category will promote the efficient use and protection of natural resources, reduce the adverse negative impacts of coastal flooding, and advance a thriving culture and economy.

### **Cultural Facilities:**

Projects in this category improve the city's infrastructure systems and support the city's initiatives to promote tourism and to provide opportunities for cultural enrichment to residents.

**General and Other:**

Projects in this category improve the city's infrastructure system and maintain public safety through enhancement and maintenance. Projects are typically specialized in nature and do not fall within the other defined policy areas.

**Neighborhood Development:**

Projects in this category improve the city's infrastructure systems, and preserve and enhance the city's taxable real estate base. These projects may include improvements to the city's community roadways and acquisition of property to strengthen neighborhoods.

**Public Buildings:**

Projects in this category improve the city-owned infrastructure by providing adequate maintenance to existing facilities and construction of new or renovated facilities.

**Parks and Recreation Facilities:**

Projects in this category enhance the city's recreational facilities, provide opportunities for cultural enrichment, and promote tourism.

**Transportation:**

Projects in this category improve the city's roadway infrastructure and satisfy the Commonwealth of Virginia's mandate regarding the Urban Roadways Program. This would encompass improvements to primary and secondary vehicular passageways, bridges, and underpasses, including street lighting, signalizations, and undergrounding of utilities relating to streets and highways.

## PROJECT INFORMATION

---

The FY 2023 CIP provides funding for projects from the General Fund (CP), Parking Facilities (PF), Storm Water Utility (SW), Wastewater Utility (SF), and Water Utility (WF) funds.

Financial information for projects can be found throughout the CIP and in the sections listed below:

- **CIP Funding Sources:** Lists the sources of revenue the city uses to fund capital projects.
- **CIP - Uses of Funds:** Lists the projects adopted in the FY 2023 CIP.
- **CIP Five-Year Plan Summary:** A five-year outlook of planned projects and funding amounts in the FY 2023 – FY 2027 CIP.
- **Project Detail by Policy Area:** Projects shown on the CIP Five-Year Plan Summary are listed individually with a detailed financial breakdown.

Each project within the FY 2023 – FY 2027 CIP has an individual project information page. The definitions and descriptions below are provided as a guide to understanding the individual project pages.

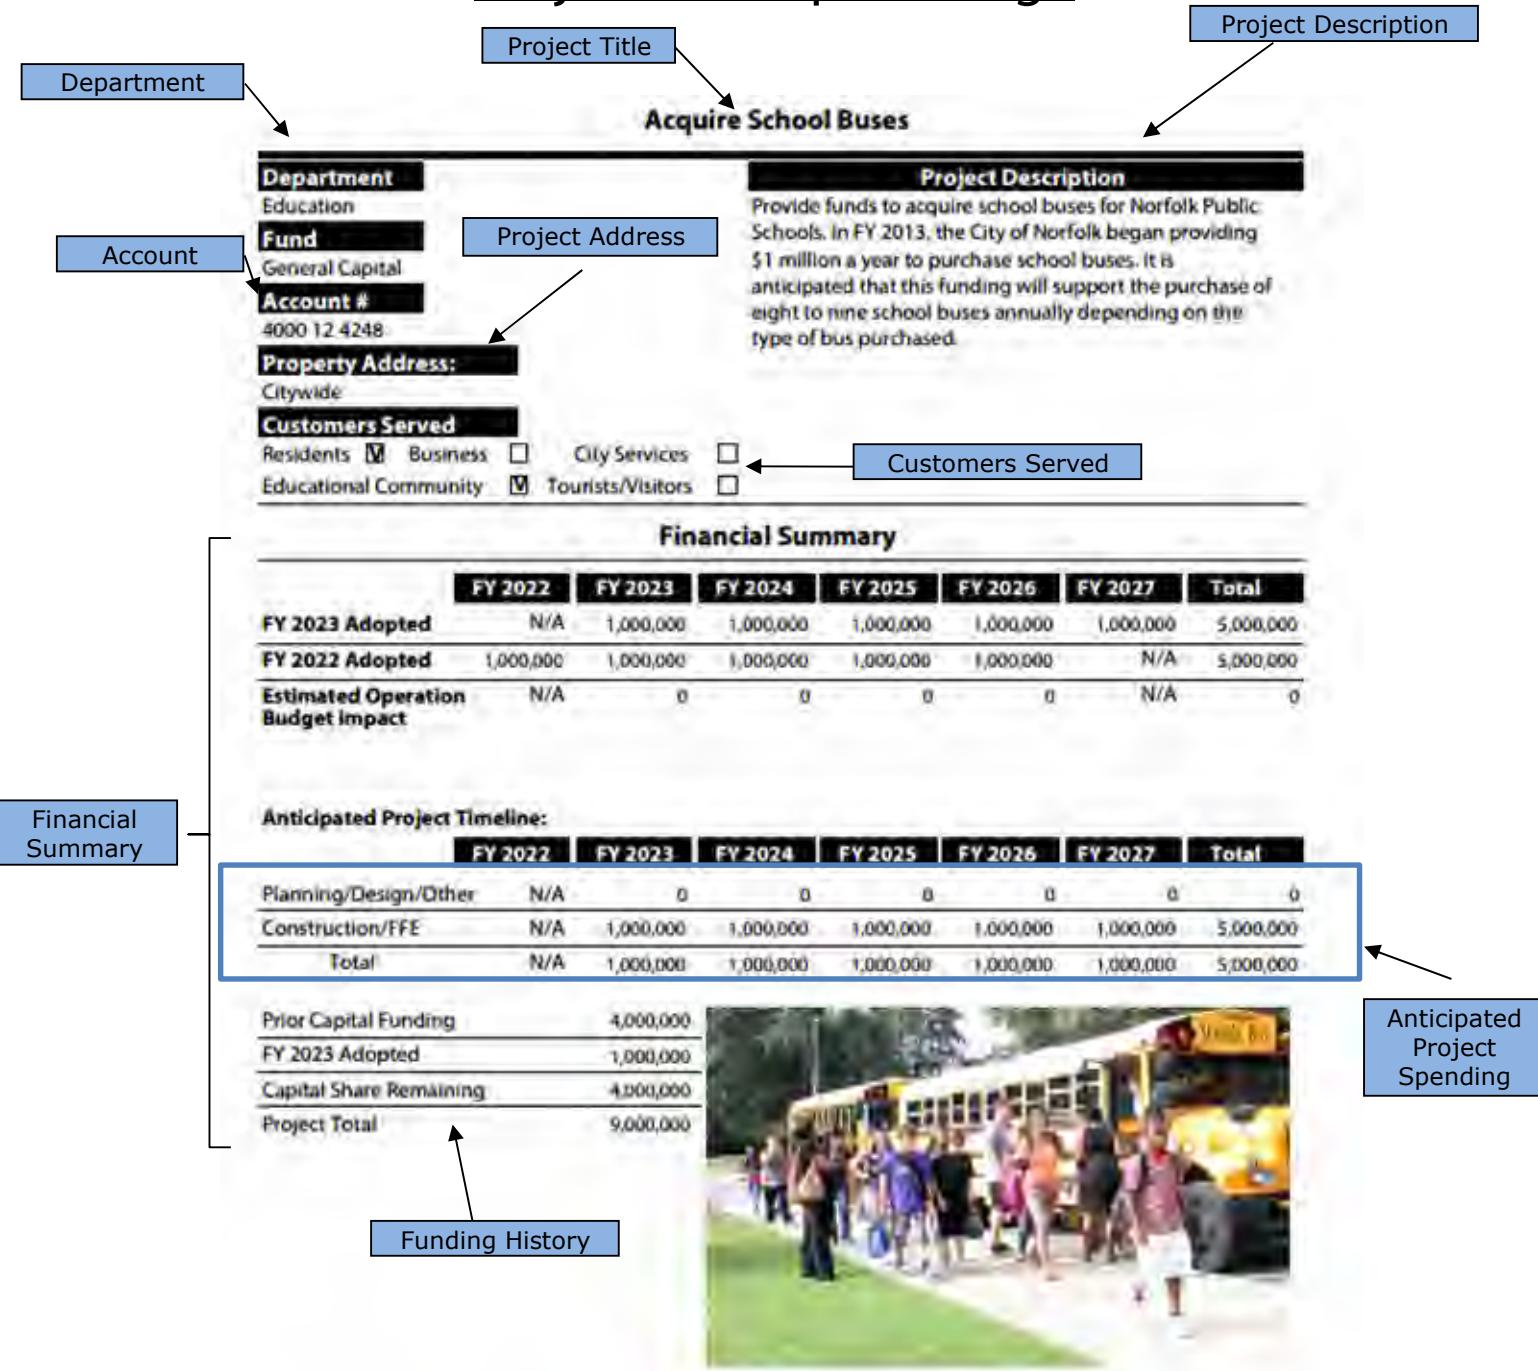

SEE SAMPLE PAGE FOLLOWING THESE DEFINITIONS FOR MORE INFORMATION.

**For each project, the following information is included:**

- **Project Title:** Provides a descriptive name for the project.

- **Department:** Identifies the city department that will function as the project sponsor and manager.
- **Property Address:** Identifies the location of the project. Several categories are used to identify the location of a project. Addresses are listed when a project is concentrated in a specific area. The term citywide is used when the project involves several locations throughout the city or has a citywide impact. The term "to be determined" is used when a specific site for the project has not been identified.
- **Customers Served:** Indicates the beneficiaries to be served by the project.
- **Project Description:** Provides a brief and informative description of the project.
- **Financial Summary:** The financial summary provides detailed information on the amounts appropriated for the project. This section includes the following:
  - **FY 2023 Adopted:** Reflects the amounts for the project. Amounts listed in FY 2024 – FY 2027 are planned amounts in the upcoming years.
  - **FY 2022 Adopted:** Amounts that were approved for the project when the budget was authorized in the previous fiscal year.
  - **Estimated Operating Budget Impact:** Reflects any ongoing operating budget expense once the project is complete. These expenses are not paid from the capital budget.
  - **Anticipated Project Timeline:** Amounts shown are a projection of how and when funds will be spent in FY 2023 – FY 2027.
  - **Prior Capital Funding:** Shows the dollars previously contributed to the project from previous appropriations.
  - **Capital Share Remaining:** Reflects the amount of capital funding projected to complete the project. This amount is the sum of FY 2024 – FY 2027.
  - **Project Total:** Reflects the total amount of money dedicated for completion of the project.
  - **Picture:** Includes a visual depiction, if available, of the project location or the end result expected from the completion of the project.

## OPERATING IMPACT OF MAJOR CIP PROJECTS

---

The operating impact of capital projects is analyzed during the CIP development process. Many new capital improvement projects entail ongoing expenses for routine operation, repair, and maintenance upon completion or acquisition. Some new capital facilities may also require the addition of new positions.

Estimated revenues and/or operational efficiency savings associated with projects are also considered during the capital project evaluation and review process. Operational costs of new facilities can have a significant financial impact on the operating budget of the city. Therefore, these costs are weighed when a project is considered for funding. Conversely, the positive contribution that a capital project can make to the fiscal well-being of the city is also factored into the decision-making process. Capital projects such as redevelopment of under-performing or under-used areas of the city, and the infrastructure expansion needed to support new development, help promote the economic development and growth that generates additional operating revenues or operational efficiencies.

As CIP projects are completed, the operating costs of these projects are identified, prioritized, and justified as part of the city's budget development process. The city plans and budgets for significant start-up costs, as well as operation and maintenance of new facilities in the operating budget. If applicable, each project contains an operating and maintenance projection for the operating costs for the first five years.

The table below represents the estimated operating and maintenance costs for approved projects. These impacts are taken into consideration in the city's expenditure forecast. Operating impacts are analyzed for funding on a project-by-project basis because, at times, these impacts can be absorbed within a department's current budget and, at other times, additional funding may be needed. These costs are taken into account when the city authorizes a project for capital funding. CIP projects that have been completed in prior years, which have operating impacts, are not shown here. Prior projects such as the Southside Aquatics Center and the new courthouse, for example, have annual operating and maintenance costs that have been added to the operating budget as these buildings have already come online.

## Convert Street Lights to LED

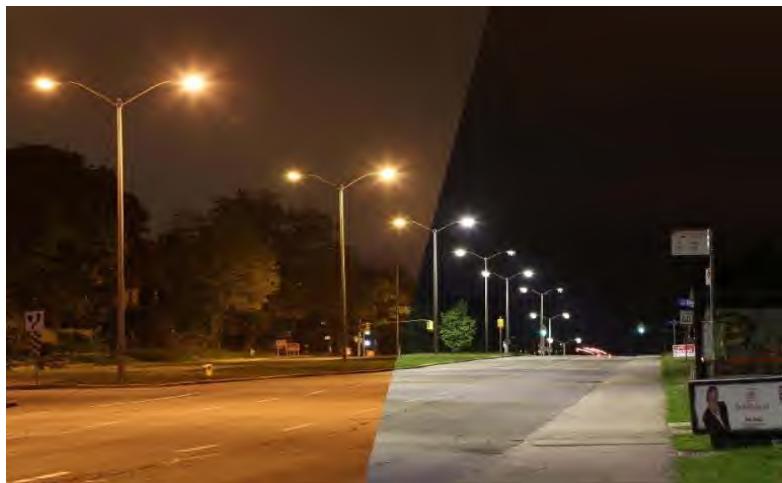

Department	Project Description
Transit	Provide funds to replace streetlights with light emitting diode (LED) lights. The city will work with Dominion Power to facilitate a complete conversion of streetlights to LED. Dominion estimates it can convert 1,000 streetlights every month. At roughly 34,000 streetlights, the project is expected to take around three years to complete. The conversion to energy efficient LED lights will also create substantial electricity savings and result in better lighting.

## Construct Public Boat Ramp on Pretty Lake

Department	Project Description
Public Works	Construct a new public boat ramp on Pretty Lake. This will be the first public boat ramp on Pretty Lake and will reduce congestion at the city's two other public boat ramps. The new boat ramp will include boarding piers, a kayak/canoe launch, and public parking for approximately 20 boat trailers and vehicles. This is a neighborhood CIP project and is made possible by the American Rescue Plan Act.

## Construct Wooden Fishing Pier at Granby Street Bridge

Department	Project Description
Parks and Recreation	Provide funds to construct a wooden fishing pier with an asphalt path near the Granby Street Bridge. The pier would be 2,500 square feet and construction would include an asphalt path 300 feet by 8 feet wide leading from the parking lot to the pier. A parking area would be created, as there is currently limited space in the area. This is a neighborhood CIP project and is made possible by the American Rescue Plan Act.

## Construct Calvary Cemetery Mausoleum

Department	Project Description
Parks and Recreation - Cemeteries	Provide funds for the construction of a mausoleum at Calvary Cemetery. A mausoleum is a free standing building with tomb/casket spaces and ash niches-spaces for interring cremated remains. The mausoleum would have 360 casket spaces and 432 niches to provide families with burial options at Calvary Cemetery as the usable land within the historic cemetery is limited. This is a neighborhood CIP project and is made possible by the American Rescue Plan Act.
